DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 23, 26-27, 30, 34 and 37 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al. (5,251,033).

Regarding claims 23, 26, 30, 34 and 37, Anderson discloses a DC responsive equalization for television transmission channel irregularities comprising the steps of: identifying a direct current (DC) component of a received signal (see abstract, fig.1, element 20, col.2, lines 65-68 and its description); and controlling the operation mode of the equalizer in response to the identification of the direct current component of said received signal (see fig.1, element 24, col.3, lines, 24-40, figs.3-4, element 24, col.4, lines 1-56 and its description).

Regarding claim 27, Anderson further discloses a processing the field-synchronizing signal to determine the variation of the DC offset in received signal (see col.1, lines 38-51).

Allowable Subject Matter

3. Claims 24-25, 28-29, 31-33, 35-36, 38-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
